

# LAND & SEE

OUTDOOR MÖBEL

[www.land-und-see.com](http://www.land-und-see.com)

Land & See, inspired by the esteemed legacies of Finkeldei and Siebensee, brings the refined elegance of maritime yacht and garden furniture into everyday life. Founded by brothers Alexander and Manuel, who inherited a deep passion for craftsmanship from their father's legacy at Finkeldei, the brand is dedicated to offering high-quality, competitively priced furniture that embodies the maritime lifestyle. At their specialized production facility in Indonesia, Land & See seamlessly combines German expertise

with world-class craftsmanship to create elegant, durable designs that withstand the test of time. Committed to sustainability, the brand uses only locally sourced materials, including Indonesian teak wood.

With a vision to re-imagine the outdoor furniture market and adding their unmistakable maritime flair, Land & See invites you to experience the timeless elegance and craftsmanship that have become their trademark.

## OUR FACILITY IN INDONESIA

At our production facility in central Java, Indonesia, Land & See combines sustainability with expert craftsmanship. We are dedicated to only using responsibly sourced teak wood, ensuring that every piece is made with materials that respect both the art form and the environment. While we do incorporate modern woodworking technology into the process, it is the precision and expertise of our in-house artisans, that truly define our furniture. With decades of experience in traditional Indonesian wickerwork, they handcraft each piece with great dedication. Carefully blending tradition with

innovative designs to create furniture that is both beautiful and will stand the test of time.

Teak wood: We support sustainable forestry practices. Teak wood comes from responsibly managed plantations, certified by reputable organizations like the Forest Stewardship Council (FSC). These certifications ensure that teak is harvested legally and sustainably, with practices that protect biodiversity and respect local communities.

Weaving materials: We use high quality synthetic wicker for all seasons with a wide range of applications, highly durable, ecofriendly and non-toxic.

## OUR FACILITY IN GERMANY

The final stages of the production take place at our Finkeldei facility in Germany, where we draw from over 60 years of experience. Here, we conduct rigorous quality controls to ensure each piece meets the highest standards before it reaches our customers. In addition, we also produce the cushions for

our bespoke outdoor and yacht furniture here. Our experienced team ensures flexibility and precision, allowing us to accommodate custom requests to meet individual preferences. This seamless integration guarantees that every piece combines the best of both German precision and Indonesian artistry.
